### **DETAILED ACTION**

1. This application has been transferred from Ex. J. Greene to Ex. D. Johannsen.

The application remains assigned to Art Unit 1634.

2. Applicants' reply of April 11, 2008 is noted. However, upon further consideration, the restriction requirement of January 4, 2008 is withdrawn and the claims are restricted as set forth below.

### ***Election/Restrictions***

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-2, drawn to the use of an organic solvent in a nucleic acid hybridization assay.

Group II, claim(s) 3-46, drawn to methods of nucleic acid analysis.

4. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons. Groups I-II share the technical feature of using one of the organic solvents as recited in claim 1 in hybridization assays. However, such a use was disclosed in the prior art exemplified by Deere et al (abstract of Letters in Applied Microbiology 27(6):352-356 [Dec 1998]; see entire abstract, noting the teaching that ethylene glycol was found to increase

Art Unit: 1634

fluorescent signals in FISH). Accordingly, this technical feature cannot constitute a special technical feature under PCT Rule 13.2, and unity of invention is lacking.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
